# Price Increase Announcement

Effective: March 3, 2025

Since the Trump Administration’s last tariff announcement in 2018, SVF has successfully transitioned many individual products to alternative countries of origin, reducing the impact of increased costs on our wholesale partners. This initiative remains ongoing, with additional products already identified for re-sourcing.

However, the latest announcement of tariffs on all goods from China will significantly affect the cost of imported materials and products across our industry. Despite our continued efforts to mitigate these costs, we must implement a price increase as outlined below.

This pricing adjustment applies to select products in specific categories (below) affected by the tariffs. If you have any questions or need assistance, please contact your SVF Regional Sales Manager or check your current pricing on the Web Portal. Thank you for your understanding and continued support.
